

## **MMA ENVIRONMENTAL EXPANDS TO PROVIDE SERVICE TO UPPER MIDWEST REGION**

**March 10, 2016**

MMA Environmental recently added six environmental health and safety compliance consultants to its team, expanding their footprint to the Upper Midwest region of Marsh & McLennan Agency. Founded in Roanoke, Virginia, with colleagues throughout the Mid-Atlantic, Northeast, and Southeast, adding this group of individuals will meet the growing need of our clients primarily in the industrial, real estate, construction, health care and energy sectors. They focus on evaluating and developing cost-effective solutions for environmental problems within a business context. MMA Environmental's consultants include licensed professional geologists, engineers and specialists certified in both industrial hygiene and hazardous materials management, all with a working knowledge of business.

Chris Borgen, Conor Edwards, Sneha Raghaven, Jamie Risic, Michael Young and Dominique Zellmer were formerly with St. Louis Park, Minnesota-based Industrial Protection Corporation (IPC), an environmental health and safety consulting firm that was founded in 2000. They will work closely with MMA's existing insurance brokerage groups as well as its safety and loss control and health management/wellness consulting teams to design and deliver comprehensive environmental health and safety compliance management programs.

By uniting these resources, MMA can implement even stronger programs to prevent and mitigate corporate risk while providing the insurance products that deliver the necessary financial backing when problems occur.

"We are excited to expand our team in the upper Midwest. They bring a wealth of services and expertise highly sought by MMA clients," said Drew Flynn, President of MMA Environmental. "Their core focus will be on providing operational risk management services to a broad base of manufacturing, energy and real estate clients throughout the Upper Midwest."
